

Focus on:

# Public Transport Priority

**Our helping hand for your public transport!**

Increase your efficiency and enhance your services for the passengers.

## **Our helping hand for your public transport!**

Whether bus, tram or light rail – many different factors affect the public transport operations. Structural aspects, traffic and signaling, operation rules and procedures - all these can be optimized by applying suitable priority measures.

Let us develop the best strategy for your company. Following your specific needs we will offer you an individually tailored implementation concept that will make your transport operations even more attractive.

And of course we will support you throughout the implementation process.

We are looking forward to our cooperation!
